

AAYUSH C. ACHARYA

Email: aayushcurious@gmail.com

Phone: +1 347 497 8661 / +977-9741805012

PROFESSIONAL SUMMARY

Results-driven technical founder with 5+ years of experience in full-stack development, system architecture and database. Demonstrated expertise in government consulting, HIPAA-compliant healthcare systems, and open-source contributions.

ACADEMIC QUALIFICATION

Graduated with a **Bachelor's In Computer Science** from London Metropolitan University with **2:1 Honours**.

Pursuing **Master's In Data Science And Statistics** from Massachusetts Institute of Technology

TECHNICAL SKILLS

Programming & Development: Software Development Life Cycle (SDLC), Full-Stack Development, Data Visualization

Languages: React, Node, Typescript, Electron, Python

Cloud & Infrastructure: AWS, Government Integrated Data Center (GIDC), VPS/RDP

Artificial Intelligence: n8n, OpenAI, Gemini, BYOK

Compliance & Security: HIPAA Compliance, Healthcare Data Protection

Data Management: SQL, HDF5, OPeNDAP, Database Design, Data Consolidation, DML

PROFESSIONAL EXPERIENCE

Founder

Tackoom

Jan 2022 - Mar 2026

- Scaled organization to win National ICT Startup Award from the Government of Nepal
- Worked in a bootstrapped environment to aggregate over 800+ service providers for counseling
- Worked in Retrieval Augmented Generation (RAG) based engines for counselee/counselor matching services
- Pioneered the startup as one of the most known names in the region

Chief Technical Officer

Nutriansoft | United States

Feb 2024 - May 2026

- Managed cross-functional development team for a US-based healthcare technology startup specializing in patient management solutions
- Co-ordinated with senior Product Management team and managed fullstack developers and network engineers
- Developed and maintained HIPAA-compliant healthcare management systems deployed on AWS infrastructure
- Designed and implemented secure cloud architectures ensuring full compliance with healthcare data protection regulations
- Wrote production-level code for scalable nutrition and patient management platforms
- Collaborated with stakeholders to deliver compliant digital health solutions meeting federal healthcare standards
- Oversaw technical implementation, code reviews, and team coordination for healthcare software projects

AI Engineer and LLM Specialist

AFAQ AI | Oman (Remote)

May 2025 - August 2025

- Led a team to develop Streamlit based web application for automated tender generation and proposal evaluation system
- Worked with Ministry of Transportation, Communication and Information Technology
- Designed and implemented user interface for RFP (Request for Proposals) generation and multi-proposal comparison

- Built API integration infrastructure to interface with AI models for document processing and evaluation

Fullstack Technical Consultant

Government of Nepal (GoN) | Kathmandu, Nepal

October 2024 - June 2025

- Developed SQL based Internal File Sharing System for the National Health Training Centre and Ministry of Health and Population
- Conducted SDLC planning and requirement analysis for internal file sharing system aligned with operational requirements
- Successfully deployed the RDBS system within the a private network GIDC infrastructure, ensuring scalability and security compliance

Open Source

Ethereum | Community (Remote)

March 2020 - May 2024

- Contributed to Ethereum's official Git repository with consistent pull requests
 - Listed in Ethereum's official website as a community contributor
 - Worked on smart contract utilizing Git version control and open-source technologies for Decentralized Applications within the Ethereum ecosystem
 - Collaborated with the translation department to ensure global accessibility of technical documentation and resources for the international developer community
-

Award & Recognition

National ICT Award 2025

- Decorated by Rt. Honorable Prime Minister KP Sharma Oli, on the recommendation of Ministry of Communication and Information Technology

Global NASA SpaceApps Finalist

- Honored as Finalist for NASA's Global SpaceApps Challenge of 32 countries, by working on HDF5 and OpenDAP data formats in NASA repository
-

Side Project

OpenDAP and HDF5 Analysis and EDA

NASA - National Aeronautics and Space Administration | Remote

September 2020 - December 2021

- Led a multidisciplinary team to develop innovative solutions leveraging NASA's open datasets for space exploration challenges
 - Utilized HDF5 and OpenDAP data formats for processing and structuring complex scientific datasets from space missions
 - Developed advanced data visualization tools to interpret and present solar data, enhancing analytical capabilities for scientific research
 - Achieved significant recognition and strengthened team visibility within NASA's global community through consistent high-quality project submissions
-

CERTIFICATIONS

- AI Strategy and Growth for the Modern Board
 - Azure OpenAI Service
 - Automated Machine Learning in Azure
 - SQL Grandcourse 2: Data Query Language (DQL)
 - SQL Grandcourse 3: Data Manipulation Language (DML)
 - SQL Grandcourse 1: Data Definition
-
